

Assignment

Overview

Overall data set independently shows upward trend, occupancy rate tells a different story.

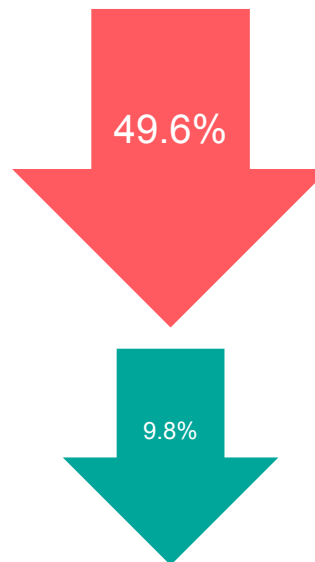

January 2017 - July 2018 occupancy rate has displayed a fairly steady decline until July 2018.

July 2018 to August 2018 is our focal point due to the significant surge.

Southland Region

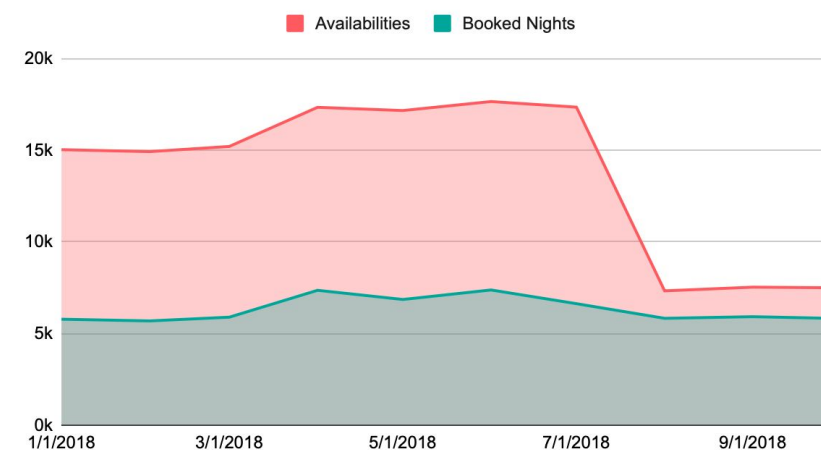

- **Southland** has been the primary driver in the late 2018 surge which resulted in a **28.8%** surge exclusively in this region.
- **Results** point directly to the disproportionate relationship between the decrease in Availabilities and Booked Nights.
- **Entire Home/Apt** within this region accounts for **~66%** of the declining impact.

Overview - Southland Region

Entire Home/Apt

Impact Factors

Hosts relinquishing availabilities

Seasonal Events/Festivals

- Festivals move to another location (seized to exist)
- Cancelled Event(s)
- Prior year damages due to festival style tourists.

Natural Disaster or Climate Event

- Adverse weather conditions may cause travelers to be redirected away from the region/area.
 - Hosts may proactively remove their listing(s), to mitigate further liability.

Competitor Sniping

- Competitors target opportunities, by releasing new features and launching target campaigns:
 - Capitalizing on peak travel seasons.
 - Offering deals during major events.
 - Price adjustment strategies

Economic Factors

- Employment growth within the area
 - Hosts change from short to long term rentals/leases.
 - Long term commitments for influx of new company employees.
 - Perceived steady income.

Political Instability

- Political unrest or uncertainty may cause fluctuations.
- Government Policy Changes; (Visa regulations, travel restrictions)

Regulatory Changes

- Changes affecting short-term rental platforms or accommodations, such as taxation policies, zoning regulations, or licensing requirements can influence the availability and affordability.

Game Plan

Investigation & Identification

- Based on the possible impact factors, further exploratory measures may assist in a proper diagnosis and resolution towards future occupancy consistencies.
- Analyzing these scenarios can help the organization identify where competitors may be gaining an advantage and devise strategies to counteract their promotional efforts

Host Dialogue

- Open communication with the various hosts will enable the team to gain a better insight regarding what would lead them to remove a listing or relinquish availabilities throughout the year.
- An open dialogue with those hosts in the Southland region as well as other regions such as Essos (which displayed a more streamlined occupancy rate) will allow the team to gain a grasp of the various factors that drove this spike as well as possible future spikes.

Suggestions

- Recommending an increase in Private Room listings vs Entire House may assist both the AirBnb organization and the hosts as the occupancy rate performed best with this room type (within this region [Southland]).
